

Uploading Fieldwork Logs in Moodle

1. Format: It is best to upload scanned logs in the pdf format.
2. Uploading: Moodle is set up to accept multiple logs for the whole semester. It is best to upload logs after you complete fieldwork hours for a class. If you are uploading more than one log, DO NOT CLICK on the SEND FOR MARKING button which appears after you submit a log. This keeps your uploading site OPEN so you could upload more logs. Click this button only after you have uploaded all of your logs.
3. Technical Help: email soetechga@adelphi.edu if you need help or if you clicked on the Send for Marking button by mistake. They could reset your upload settings so you could reupload your logs.
